📍 Tandang Sora Quezon City

CAREER OBJECTIVE

Computer Engineering graduate with practical experience in IT support, network configuration, and backend development. Eager to apply technical skills in infrastructure and systems support while continuously learning and contributing to a tech-driven team. Motivated to grow professionally in a dynamic IT environment.

EDUCATION

Bachelor of Science in Computer Engineering

Systems Technology Institute (STI), 2021–2025

Cum Laude

Senior High School (STEM Track)

Systems Technology Institute (STI), 2019–2021

SKILLS

- Networking Fundamentals
- Computer Hardware Maintenance
- Linux System Administration
- Adaptability
- Team Collaboration
- TSM Tools (GLPI)
- Virtualization (VMware)
- Backend Development (JavaScript, Express.js, Firebase, SQLite)
- Problem-Solving

EXPERIENCE

IT Technical Support Intern – Unioil Petroleum Philippines Inc. (Feb – April 2025)

- Assisted in configuring and maintaining wired/wireless networks (Ubiquiti, router upgrades)
- Installed and administered Linux OS with Samba for file sharing and access management
- Performed hardware upgrades, troubleshooting, and resolved blue screen/system errors
- Designed and simulated network topologies using GNS3
- Utilized GLPI ticketing system to manage IT support requests

Capstone Project – Facial Recognition System for the Visually Impaired

- Developed a camera-based mobile system that detects faces and provides voice feedback
- Integrated Firebase for authentication and cloud storage

SEMINARS AND CERTIFICATIONS

- AWS Academy Cloud Foundations [96064], 2024
